

When your order needs to be delivered to a country outside the EU, prices are VAT-free but custom clearance fees, such as local or import tax, can be charged upon delivery depending on the country.

To avoid surprises we share an indication of the custom clearance fees for most common non-EU countries.

Tax threshold = An indication for the customers at which limit of earnings tax need to be paid. So any income less than the stated amount would not be taxed.

Tax (VAT/GST) = Value Added Tax. This tax is charged to consumers when they buy any good or service.

Duty threshold: A tax threshold imposed by a government on goods from other countries. The reason for duty tax is to increase prices on imported goods to make these products less "desirable" so buyers are encouraged to support the domestic market. The import duty percentage varies for each category of goods.

Scroll down for the overview

Country	What kind of custom clearance fees	Indication of custom clearance fees
