

Ring sizes

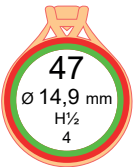

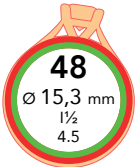

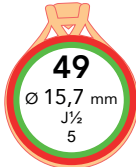

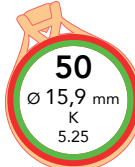

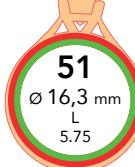

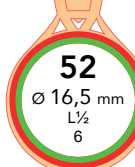

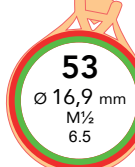

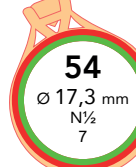

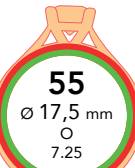

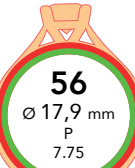

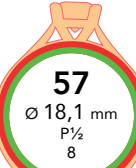

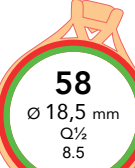

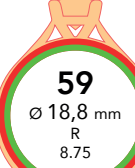

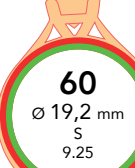

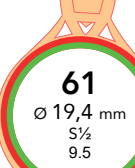

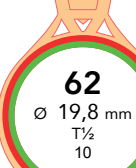

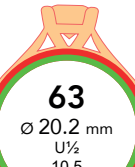

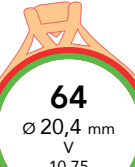

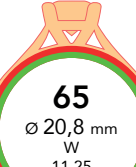

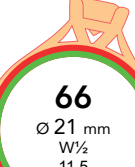

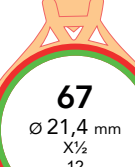

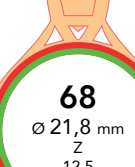

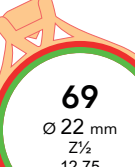

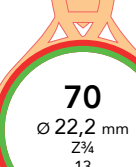

How to measure your ring size

Please make sure your printer is set to 100 percent for accurate size.
 Check the printer settings by clicking ctrl-p
 Check if the size is accurate afterwards by using your own ruler or measuring tape.
 (10 cm has to be precisely 10 cm for the size to be correct)

Find your ring size

If you have a ring that fits perfectly, place it on top the circles. Please make sure the inner circle is clearly visible, The outer circle should not be visible (from above). This is the correct size. If you are between sizes, we recommend the larger size.

You can also order your own set of sizing rings with which you can determine your exact ring size.
 Send an e-mail to our Customer Service Department: customerservice@diamondsbyme.com
